

Edmund Gao

IT consulting and technical sales — I help clients scope the right systems, deploy them, and actually get them adopted.

About

The work I'm best at sits between what a system can do and what a client actually needs. In practice that means being in the room twice: once to scope and sell it honestly, and again when it has to run inside a business that already has its own workflows, staff, and software.

Doing that across warehouse automation and CRM taught me two things. The constraint is almost never the technology — it's the racking, the headcount, and the process nobody wants to change. And a rollout isn't finished until someone else can repeat it without me, which is why I write the documentation before I leave.

I'm completing a Master of Networking Technology at Carleton in May 2027, after a BTech in Technology Management from Ontario Tech.

Experience

Mar 2025 — Apr 2026

Toronto, ON · Hybrid

Technical Operations Sales → Manager Assistant & Sales

[Advantics Robotics](#)

Ran the technical half of the sales conversation — translating AGV and AMR capability into what it would mean on a client's specific floor, against the racking, headcount, and inventory systems they already had.

Moved from selling into delivery after six months, supporting deployments through to running and owning the integration work between the robots and the warehouse's existing systems.

Solution scoping

Systems integration

Jun 2024 — Aug 2024

Markham, ON · Hybrid

Project Assistant — Internship

[Aibao Insurance](#)

Planned, configured, and implemented a CRM system alongside the project manager, focusing on adoption and fit with existing business processes rather than just the technical setup.

Evaluated CRM platforms including HubSpot and Salesforce, comparing workflows and integration options before the team committed.

Built and customized WordPress sites, and improved search visibility by optimizing content and tracking performance metrics.

Wrote a slide-deck tutorial documenting the WordPress-to-HubSpot integration so the team could repeat the setup without me.

Sep 2023 — Sep 2024

Oshawa, ON

Event Coordinator

[Ontario Tech University CSSA](#)

Planned and ran a range of student events — assemblies, performances, fundraisers, and extracurricular programming — coordinating with association members across a full academic year.

Event planning

Communication

May 2022 — Aug 2022

Scarborough, ON · On-site

Sales Representative

[Best Vanity Toronto](#)

Maintained inventory records and monitored delivery schedules and stock levels so customer orders and production runs never stalled on supply.

Implemented quality control checks on newly assembled vanities, and handled returns and repairs on damaged items.

Diagnosed and resolved customer issues with product usage, maintenance, and repair, and independently organized sales promotions.
